

Apex Centinel Trust – Integrated Investment Model

(506(c) Offering for Verified Accredited Investors)

The Apex Centinel Business Trust model begins with Bitcoin mining and expands into a vertically integrated, impact-driven ecosystem. Mining profits are strategically deployed to fund both innovation and justice — from legal technology and paralegal services to nonprofit initiatives supporting sex-trafficking victims.

This model is intentionally designed to deliver both investor returns and measurable social impact.

Apex Centinel Activity Funding Model

Apex Centinel Trust is a faith-based, mission-aligned investment structure operating under **Rule 506(c) of Regulation D**, available only to **verified accredited investors**. It is engineered to generate sustainable profits while advancing anti-trafficking and access-to-justice initiatives.

1. BITCOIN MINING

The foundation of the Trust's operations is consistent investment in ASIC mining equipment. Monthly mining revenue increases as new machines are acquired and reinvested.

2. SAAS PLATFORM

Mined profits help expand DocupletionForms.com, a legal-tech SaaS platform that enables conditional logic automation for legal documents, including HIPAA-compliant functionality.

3. PARALEGAL SUBCONTRACTING

Through Apex Law Service, these legal tools support litigation teams via subcontracting services that improve affordable access to justice nationwide.

4. PRIVATE INVESTIGATIONS

Praxis Investigations collaborates with OSINT analysts and licensed investigators to uncover and document trafficking-related operations.

5. NONPROFIT ADVOCACY

PraxisProfessional.com offers paralegal aid to attorneys and promotes biblically-grounded trauma support by connecting victims to conservative Christian counseling.

All operational profits from SaaS, legal, and investigative services are cycled back into Bitcoin mining growth and nonprofit outreach. Every dollar serves a dual purpose: generating financial yield and advancing a redemptive mission.

Join a movement that unites principled investing, legal innovation, and redemptive justice.
