Company Summary

We want to purchase enough Bitcoin Mining Equipment in order to collocate in North Dakota with Crypto LLC. It will take a 2 million capital raise, and we will begin making \$55,000 monthly with approximately 300 Bitcoin Mining Machines. We are going to be perpetually funding Sex-Trafficking Victim Advocacy Private Investigation Research for Rescue Businesses and also Paralegal Work for Pro Bono Attorneys who take the victims on as Clients.

Executive Summary

Management

We are planning to collocate our Bitcoin mining machines with Crypto LLC, which has an excellent machine management team. The work we are going to be doing for Private Investigators is baseline paralegal work which is going to be sourced out from my Alma Mater, the University of San Diego Paralegal Program, which is an ABA Curriculum Approved Training Program. We plan on doing our direct work for Licensed Pro Bono Attorneys as supervisors.

Customer Problem

We want to work with seasoned Bitcoin Miners to perpetually fund our Sex-Trafficking Victim Advocacy. Bitcoin Mining is a great perpetual funding source moving into NVIDIA GPU hosting because Bitcoin can simply be sold and no marketing needs to be done. We can develop a marketing plan as we move into GPU hosting which will increase our monthly profit about 4x, and this is how we plan on funding our Pro Bono Crime Victim Advocacy Work!

Product/Services

The main value proposition is that we will profit from the approximately \$0.04/kWh electricity price in North Dakota at the 8 MegaWatt Facility being developed by Crypto LLC, with whom we are partnering to collocate our mining equipment at their Mining Farm.

Target Market

Simply put, Bitcoin is easy to sell. Mining it efficiently with Crypto LLC will fund our work in a mission field where the innocent are destroyed by horrible people every day, and they need groups like ours to fight for them.

Business Model

We plan to simply expand for the time period remaining by creating new stock classes with approval from our initial funders, with side note controls. Each additional 2 million in Capital Raised will make our business an additional \$55,000 to \$200,000 in monthly profit. Funding Pro Bono Law Work sadly will continue to be a necessary activity in society, but the silver lining is that we will be helping newly minted

paralegals gain experience.

Customers

We want to provide as much affordable LLM hosting on our NVIDIA GPU machines as possible to Attorneys who we feel we can also concurrently recruit to do Pro Bono Work for Sex Trafficking Victims and for whom we can provide effective technology and paralegal services, making their businesses more efficient.

Sales/Marketing Strategy

We plan on pumping our numbers and results in the fight against Sex-Trafficking out into the YouTube and Social Media arena building a network of volunteers who will always know who our initial investors were and know they took the opportunity to take us up on the challenge of funding for our endeavor aimed at saving so many victims.

Competitors

As far as Mining Bitcoin to fund Sex-Trafficking Victim Advocacy, we have zero competition. As far as Mining Bitcoin, we have only the problem of efficiency and feel that Crypto LLC has their current facilities together and the one they are working coming together in a pattern which will give us competitive advantage over other operations that remain profitable even at \$0.08/kWh price of electricity which is higher than our target of \$0.04/kWh.

Competitive Advantage

Our competitive advantage is our motivation to support a growing small army of private investigators who have begun sex-trafficking victim rescue businesses because of the shared Christian commitment we hold in common with them.
