

Investor Opportunity: Bitcoin Mining Buildouts

We are working on partnering with Crypto LLC, a premier infrastructure firm currently completing an 8-megawatt Bitcoin mining facility in North Dakota - a region known for low-cost, stable power ideal for sustained mining operations.

As part of this collaboration, we are launching containerized mining buildouts within the facility. Each 40-foot container unit will house top-tier ASIC miners and is engineered for long-term profitability.

Our model yields \$55,000 in projected profit per \$1.7 million invested per container.

Key Highlights:

- Location: 8MW mining center, North Dakota
- Structure: Containerized 40-foot buildouts
- Projected Yield: \$55K profit per \$1.7M buildout
- Partners: Crypto LLC (buildout & infrastructure)
- Visibility: Preview the development via Crypto LLC's official YouTube channel

This is a ground-floor opportunity. We're preparing for our first round of investor participation.
